Julie,

We are checking our team's availability for the weeks of March 12 and 19 and I'll get back to you shortly.

Thanks,

Marc

Marc,

Of the days that you proposed, February 27 is a possibility. However, I am still checking schedules and not sure that will work for the Water Board. Unfortunately, the week of March 5 (proposed dates March 6, 7, or 9) will not work. If Feb. 27 doesn't work, are there dates in the second or third weeks of March that may work for your team?

I agree that Rancho Cordova is a suitable and central location for the meeting.

Thanks for all the coordination!

**Julie**

**Subject:** Leviathan Mine - Potential Technical Meeting Dates to discuss RTV Calculations, Rational for the USL, and EPC Calculations

Julie,

As we discussed, Atlantic Richfield is proposing to hold a technical working meeting to review the methodology for calculating reference threshold values (RTVs), the rationale for using the upper simultaneous limit (USL) to calculate RTVs, and the calculation of exposure point concentrations (EPCs). We estimate about two hours will be required to cover each topic; thus, this would be a full day meeting.

We anticipate that the meeting attendees would include the U.S. EPA and its technical consultants and the LRWQCB and its technical team. Please advise if you would like any other stakeholders to attend. Because attendees would be coming from both South Lake Tahoe/Carson City area and San Francisco area, we propose to hold the meeting at Amec Foster Wheeler's office in Rancho Cordova because of its central location; however, holding the meeting in San Francisco would be a suitable alternative.

Potential dates include:

February 27 (Tuesday)

March 6 (Tuesday)

March 7 (Wednesday)

March 9 (Friday)

Anticipated meeting time would be from 9 am to about 4 pm. If we hold the meeting at the Amec Foster Wheeler offices in Sacramento we can easily have lunch brought in for the group.

Please let us know if any of these dates/times fit with your schedule.

Thanks,

Marc
